

## **Village Hall Report**

At their January meeting the trustees debated and determined the hall usage charges for the forthcoming year. These revised rates will be promulgated shortly and will take effect from 1 April.

The trustees further considered the village hall refurbishment plans and in particular the arrangements for public toilets. It was generally agreed that two 'all comers' facilities should be sufficient for the village and that these would be secured during the silent hours with access only possible with the use of a 'RADAR' type key. It was announced that the village shop manager would be a member of the refurbishment steering group.

The treasurer reported that the hall had made a modest surplus during 2023 which would be used to cover small maintenance issues.

The next meeting of the village hall trustees will be on Thursday 22 February.
