

Village Hall News – Louis Allan

EBwB Village Hall Trustees Meeting - Tuesday 11 October '22

The trustees are understandably concerned with recent and future increases in energy costs and have conducted extended discussions with energy suppliers to determine the best rates, although these are still likely to result in around a four fold increase in costs. As a result the trustees have decided to increase the hall hire costs by a modest amount which is intended to compare favourably with rates charged by other local halls. Additionally a particular levy will be made for use of ovens and ranges.

The trustees are also presently investigating the provision of fibre broadband to the hall.
