

P3 Report – Jon Roseway January 2024

Parish Paths Partnership report for January 2024

The recent storms have brought down a number of trees onto parish paths and tracks. I've informed the landowners about the ones I know of, but response time will be dictated by the amount of other storm repair work they have already committed to.

The LORP-renovated paths on the Otter estuary are proving to be very popular with walkers and bird-watchers. Elsewhere, many paths are in poor condition (muddy and slippery) because of so much rain and high footfall during the Christmas period.
