

Parish Paths Partnership report for March 2022

The riverside footpath north of Otterton Bridge is gradually being eroded by the river. The Devon CC PRow warden has decided that restoration and reinforcement of the river bank is too expensive and not a long-term solution. Therefore, the vegetation and overhanging trees have been cut back along the fence line of the adjoining fields to provide a new path. This will be a better option for families with push-chairs and people with limited mobility. Those who wish to can continue to use the riverside path.
