

Community Resilience Report October 2020

Emergency Plan Summary Booklet

Parish Council successfully applied for funding to print and distribute our Emergency Plan Summary Booklet.

A copy will be included with every copy of the November Parish Magazine.

Yettington Area Brook Flood Risk Reduction

Digging work to reduce the risk of flooding in Yettington, near the Exmouth Road junction, was completed in September/October.

I am particularly grateful to Kevin Quant for sharing his concerns and communicating with all parties to ensure this prevention activity was satisfactorily carried out.

The Emergency Plan

Version 2 of our new Emergency Plan is now available on the PC website.

I continue to broaden the scope of The Plan and further updated versions will be posted over the coming months.

COVID 19

A new Volunteer WhatsApp group has been created, along with refreshed guidelines to ensure it remains an appropriate communication route.

The 2nd wave, currently being experienced elsewhere in the UK, appears slower to reach the South West, and long may that continue!

But we must be alert to the likelihood of greater restrictions in the coming cold Winter months.

Whilst I remain happy to coordinate our response I must stress that the responsibility for appropriately responding to residents needs throughout our parish rests with ALL Parish Councillors.
